

LE MINH THIEN

WEB DEVELOPER INTERN

Thu Duc, HCM • 0328077936 • minhthienit39@gmail.com

www.minhthien.space

SUMMARY

Third-year Information Technology student with hands-on experience in full-stack web development, seeking a Software Engineer internship to apply technical skills and gain practical industry experience. Passionate about building scalable applications and continuously improving problem-solving and teamwork skills.

- As showcased in my interactive portfolio at **minhthien.space**

EDUCATION

Posts and Telecommunications Institute of Technology

Sep 2024 - Present

Engineering of Information Technology

Ho Chi Minh City, Vietnam

- Academic Encouragement Scholarship (2024-2025)

SKILLS

Frontend: React.js, Next.js, TypeScript, TailwindCSS, Shadcn UI, TanStack Query, Zustand

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, OAuth

Database: MySQL, MongoDB

Tools: Git, Docker, Postman

Programming Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS

AI-Assisted Development: Claude Code, ChatGPT, GitHub Copilot

Deploy: Vercel, Render, Aiven

Languages: English (Intermediate – Technical Reading & Documentation)

PROJECTS

Cyper - Ecommerce Platform | Fullstack Developer | Personal Project

- Tech Stack: **Next.js, React.js, TypeScript, TailwindCSS, TanStack Query, Zustand, Node.js, Express.js, MySQL**
- **Live Demo:** www.cyper.store
- **Github (Frontend)** : github.com/MTIT396/Cyper-Ecommerce-Client
- **Github (Backend)** : github.com/MTIT396/Cyper-Ecommerce-Server
- Developed a full-stack e-commerce platform using React, Next.js, TypeScript, Node.js, Express.js, and MySQL.
- Designed scalable RESTful APIs following layered architecture and service-based backend structure.
- Implemented JWT authentication and Google OAuth integration with access/refresh token workflows, protected routes, and centralized session management.
- Built core business modules including product management, cart, wishlist, checkout, order processing, and user profile workflows.
- Developed advanced frontend features including URL-synchronized filtering, infinite scrolling, reusable hooks, and centralized state management using Zustand and TanStack Query.
- Integrated MoMo Sandbox payment workflow with asynchronous transaction verification and real-time order synchronization.
- Optimized application performance with lazy loading, image optimization, loading skeletons, reusable query services, and centralized error handling.
